

Boston Medical Center

Position: Medical Technologist II

[Apply Here](#)

Department: Blood Bank

Schedule: 40 Hours Evenings

POSITION SUMMARY:

Under the general direction of the Technical Supervisor, provides ancillary support for clinical activities by performing Blood Bank Transfusion Service patient testing and appropriate interpretation of moderate and high complexity clinical laboratory tests as defined under CLIA '88. Requires ability to respond rapidly to high volume need for New England's busiest trauma service.

EDUCATION:

Requires a Bachelor's degree from an accredited university or college in Medical Technology or Clinical Laboratory Science which includes successful completion of a supervised course of clinical internship in an approved hospital laboratory, or a Bachelor's degree in an applied science (Chemistry, Biology, Biochemistry).

CERTIFICATES, LICENSES, REGISTRATIONS REQUIRED:

Preferred: Certification by American Society of Clinical Pathologists (ASCP) or National Credentialing Agency (NCA) or equivalent agency as a Medical Technologist, Clinical Laboratory Scientist, Medical Laboratory Technician, or specialty certification.

** Equivalent agency is defined as an agency that requires a degree in science from an accredited college or university with successful completion of an examination for certification. Such agencies include but are not limited to ASCP, NCA, American Medical Technologists (AMT), American Association of Bioanalysts (AAB), Health Education and Welfare (HEW), and American Society of Microbiologists (AMT).*

EXPERIENCE:

For those with a Bachelor's Degree in Chemistry, Biology, Biochemistry, must have two years of experience in a clinical laboratory.

If the Bachelor's Degree is in Medical Technology or Clinical Laboratory Science, then must have one year experience in clinical laboratory.
